

PHILIPS

Let's make things better.

If you're tired of changing lamps, maybe it's time to change your lamps.

Philips lamps last longer so you change them less frequently. Which means you not only save on energy and disposal costs, but labor and maintenance costs as well. Philips ALTO® family of long life lamps with reduced mercury, combined with energy efficiency, are better for the environment. Savings on energy and maintenance make environmental responsibility a smart business decision.

So why not put them to work for you?

ALTO Universal T8-Fluorescent Lamps:

- ▶ Full rated life on all T8 ballast types.
- ▶ Save up to 42% more energy than standard T12 systems.
- ▶ HI-VISION® Phosphor can increase color rendering to 86.
- ▶ 33% longer life than standard T8 systems under instant-start operation.
